erty offers four spacious incl
fits from natural light e w

bathrooms are finished in a contemporary style with walk-in showers and modern fittings, maintaining a consistent design language throughout the house while ensuring practical functionality for both permanent living and holiday use. Comfort within the villa is supported by underfloor heating throughout the entire house, including bathrooms, ensuring a stable indoor temperature across seasons. A domotic system allows control of key functions within the home, while solar panels contribute to energy efficiency and reduced running costs. High-quality aluminium windows and double glazing improve insulation and acoustic comfort, and electric blinds and entry systems add an additional layer of security and ease of use. Torreblanca forms part of the eastern area of Fuengirola, a location increasingly sought after for second homes due to its proximity to the beach, established infrastructure and accessibility to ?both ?Málaga ?and ?Marbella. ?The combination of residential tranquillity ?and ?access to restaurants, transport and ?coastal ?promenades makes ?it a practical base ?for ?both ?short ?stays ?and ?year-round ?living.
